AI for Public Safety, Built for Confidence
A secure platform helping you act early and lead with operational confidence.

Modern Tools for Public Safety Leadership

At PowerDMS, we use secure, assistive AI because we believe public safety agencies need defensible operations – not outdated systems – so leaders can reduce risk and act decisively.

Key Challenges

When scrutiny comes, evidence matters. Manual processes force leaders into reactive decisions and create blind spots in vetting, training, and responder wellness. These disconnected systems and manual workarounds limit visibility, raising attrition and eroding internal and public trust.

Policy ≠ Readiness

Signed policies alone don't confirm staff are trained, prepared, or ready for real-world operational demands

Frontline Gaps Grow

Manual administrative work pulls supervisors out of the field and away from higher-value agency initiatives.
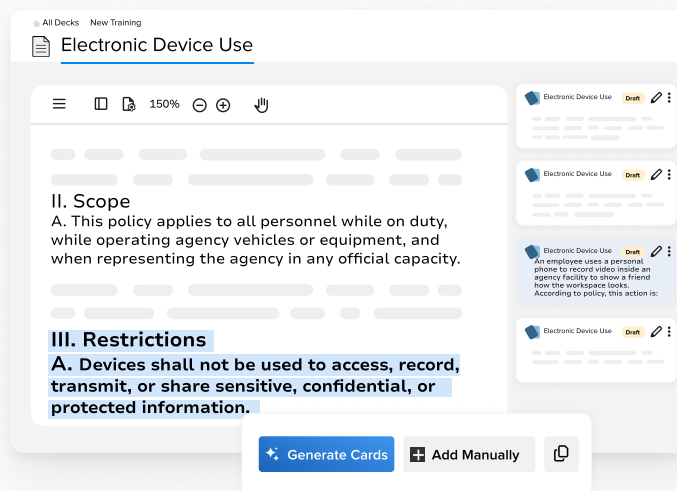

Wellness Signals Missed

Stress and fatigue indicators go unseen, forcing leaders to react only after incidents, burnout, or liability emerge.

PowerDMS Delivers Secure, Human-Led AI for Public Safety

PowerDMS is a FedRAMP-authorized platform that uses AI to accelerate hiring, strengthen training, and surface wellness signals, while keeping human judgment firmly in control.

Built for leaders in high-liability public safety agencies, PowerDMS connects agency data to deliver early insight, defensible records, and operational clarity.

Unlike manual, disconnected systems, PowerDMS uses secure AI to reduce liability and help leaders defend decisions with data, not memory.

AI Solutions

PowerDMS AI	What Agencies Gain	Why NEOGOV?
Policy Training in Recall	Delivers quick, engaging policy training that keeps personnel confident on duty	Personalized learning paths adapt to each user's accuracy and confidence
Cumulative Stress Detection in Vitals	Enables proactive support by surfacing stress indicators from CAD notes	AI surfaces wellness indicators through contextual analysis, not just keywords
Character Reference Summaries in Vetted	Saves time by generating comprehensive, accurate reference summaries	Preserves investigator control while saving hours per case
Citizen Sentiment Analysis in Engage	Leaders can highlight positive trends through automated sentiment sorting	Automatically surfaces defensible public sentiment insights at scale

Defensible AI That Reduces Risk Across Public Safety Operations

PowerDMS replaces fragmented workflows with AI-enabled tools that strengthen operations and reduce risk for agencies. It provides governed assistance to improve oversight, reduce liability, and protect agency trust.

Built for public safety
AI in PowerDMS is embedded across Recall, Vitals, Vetted and Engage to support compliance.

Proven at scale
Trusted by 5,000+ agencies over 25+ years and grounded in real operational data.

FedRAMP-authorized AI
Reduces manual work while preserving professional judgment.

15+
Instructor hours saved monthly by auto-creating training

~ Cincinnati ECC

70%
faster hiring with AI-assisted reference summaries

~ Cobb County Police Department...

99.9%
accurate identification of high-stress trauma incidents

~ Internal PowerDMS Override Report

> "I can't tell you how many bad calls I've been on in my 25-year career. The cumulative stress personnel experience is crucial to their health, and Vitals allows us to track that."

Lieutenant Todd Elliott
Battle Creek Police Department
